

Living in peace and world without war,
Heaven is true love and that's what it is for;
Love never ending and peace and true love,
Harmony for each of us and all with heaven above.

The earth is a place and plenty for all,
It is really just a planet like a spinning ball,
Reading to learn what God has install,
Learning His leading from the peace, with plenty for all.

Why should we fight, what will it achieve?
Nothing for anyone and no one will need;
Wanting and waiting is like wasting away,
When we all must work for a living, with none going astray.

Living in peace is the world's full destination,
Everything right and a nothing wrong nation;
Joy for the goodness of what is done right,
God ever giving with peace and delight.

The conditions are subtle if we all do as right,
The law is perfection of things happening in light,
God looking down and seeing with His sight.
A perfect creation without war and strife.

There really is no need for any war at all,
Peace is the answer to conflict and endurance;
Let us settle our differences and get on with life,
For in life there is love if in peace we delight.

Signed,

Peace without war.
