

Above the heavens and all that there is on earth,
Is the riches and glory of the treasures of the kingdom of God;
When life has intrinsic value and all of the beauty is true worth,
It's like people and places and things that we see in a reality birth.

It gives us new meaning and has the passion and romance of true love,
It's riches and glory and it's fighting for God in the hope we all can be free;
It's peace in the offering for a mind and a heart to serve well,
And it's telling the joy and the hope of a child who learns to smell.

Once again it's riches and glory and the fashion of diligent service,
It's being true to yourself and remaining faithful to the face of grace;
It's riches and glory and it's admonishing the right in everything you do,
And it's the beauty of a blue sky and ocean when the sun comes shining through.

It's the brilliance of the season with everything falling into place,
It's a reason for the living and it's the hope of beating out of space;
It's a miracle in the making and it's the riches and glory of honour,
And it's the harmony and magic of the music of the entire human race.

It's the power and the truth of the answer to eternal prayer,
And it's the riches and the glory of being high, just on breathing air;
It's the wonder and the sadness of telling of what is still unknown,
And it's finding out the answers to the questions in the wind that's blown.

It's the riches and the glory of the trophies of island paradise,
It's hard to find and it's born with all the hell of earth no doubt;
It's the eternal highest heaven and it's worship in the presence of God,
And it's the heart of loving service of beating all things found out.

Signed,

Love is Reason
