

Put on the billy with that crystal clear water,  
For I am the Tilby man and purifications greatest supporter;  
A spoon full of tea or just drink it as is,  
But for me nothing tastes better than think kind of biz.

After a day's work all our in the field,  
Count what you earn and know what you yield;  
The Tilby's a name old household should know,  
With factories and offices renting that go with the flow.

Some people drink coke or alcohol but for me it's pure water,  
And the tea is quite nice in a bilby as a slight distorter;  
Tilby you see gets the better of me,  
For the silver will clean it and that is the key.

Waters got lead, aluminium chlorine and bacteria,  
So you need a Tilby to come straight from the factory;  
Tea for the Tilby man is just away to say,  
That purification from a Tilby must be the way.

Signed
