

It's always a matter of the weather, And whether you able to see the weather, Or whether the weather is weather to see,

Or whether you're able to see the weather.

And if the weather you see is weather out at sea,

Then the whether you see is whether the weather,

And whether you are out at sea and see the weather,

Out the weather you see and the weather out at sea.

So now you can see the weather and the whether,

And the weather you can see and the whether you want sea,

You're able to see the whether and whether you're at sea,

Because the weather you weather is whether you're at sea.

So if you see the weather and the whether you're at sea,

You're able to see the weather and weather out at sea,

Because the weather you can see is the weather out at sea,

And you able to see the whether and weather out at sea.

So if you whether the whether and weather out at sea,

You're able to see the weather and the weather out at sea,

Because the weather out at sea s whether you able to see,

And whether you able to see is weather you can see out at sea.

For the weather out at sea you can only see out of sea,

And the whether you are out at sea or not is the whether you can see.

If you're not out at sea and whether the bolts are out at sea,

You able to see the weather and the weather and not see out at sea.

Signed,

Not out at sea but whether
