

People and things of country and origin,

Are naturalized by birth, race and organisation;

If could be a case for the meaning of naturalism,

Or be confirmed to the limits of nationalization.

.

Naturalism is a raw breed and historic account,

Of the initiation and progress in a massive amount;

Like old growth rainforests are environmentally natural,

Or indigenous groups are native exclusively national.

.

To leave ones home and go out and travel the world,

Is a natural inkling but an unnatural in the word;

Or to change countries for good needs faith but it's hard,

With naturalism it is better to stay in your own back yard.

.

Naturalism is a value system and identity culture,

The heart of the matter is to see like an eagle not vulture;

To kill like a lion and not scavenge or be vulgar,

Is like the natural desire to want money to avoid hunger.

.

The belief system that riches come to those who do work,

Is like a natural desire to continually increase worth;

But the limit and ceiling is the capacity to make,

So all that you do and say is all that you take.

.

Naturalism now I guess is to find and keep a new friend,

From those that you meet and in these you depend;

For the place of your birth is your natural state,

As is the origin of the earth now our death fate.

.
