

The gift of life is still the most precious thing,

A baby being born and the joy that will bring;

The love and the peace that fills up the heart,

Of a new person on earth you can't believe it will start.

.

But the suffering and pain is still worth it all,

To have someone to hold and bring up from so small;

How could one deny this beautiful glorious thought?

That they would terminate their pregnancy and life abort.

.

The problem is real and yes it's right at the core,

Of money making people who sin to want more;

And the evil that starts in the mind of the one,

Who has decided to end the gift of a daughter or son?

.

Abortion is not a game in which to make a racket,

Or put aside all of your time for a greedy pay packet;

But think of the ways that a child can be a blessing,

And come to your senses use your mind for confessing.

.

Think of the choices and make decisions that count,

That will add up much higher in a human resources amount;

And look out to God for the wisdom and guidance,

That the prayer for the children comes under his providence.

.

And use your head to make intelligent answers,

Questioning the meaning not take irrational chances;

For the truth of the matter is a very high distinction,

Between life and death and the whole human race extinction.
