

Discernment makes decisions on God given wisdom,

So your building up treasures in an eternal kingdom;

Discernment is a gift and a tool free to use and learn,

That our lives can be saved by what we can earn.

.

We all buy the things that we want deep in our heart,

And the belief in keeping them is seen as quite smart;

As the beauty of really seeing and being is still there,

That when life to death passes everything is where.

.

Discernment must mean making miracles to happen,

That the best place to live is in heaven and be happy;

It's seeing a difference and making the right choices,

So our hope is a long time in the listening to voices.

.

It could be careful government to see plans through,

Or good leadership in management for business true;

Communicating freely those thoughts and desires,

So organisation is delivered that objectives desires.

.

It's the path that you take seeing sin right and wrong,

And carefully following the road to life that is long;

In discernment its financial advantage choosing right,

That in the victory of attainment there's eternal light.

.

So the message is made clear so I hope you see right,

As the meaning of discernment is made in each sight;

For winning is the prize we seek and care so dearly,

So that in conclusion you have seen it all so dearly.

.
