

God has dominion over heaven and all of the earth,

And it's worth all the waiting from you're tiny weight of birth;

So the best is yet to come as you learn to discover the course of life,

As you journey along the road and your journey leads you out of strife.

Dominion is the kingdom of eternal heaven and to very life,

It is understanding putting yourself in the picture of staying out of strife;

Like the kingdom with the freedom is getting the dumb out of dominion,

And the blessing is in the governing of God as almighty companion.

Doing what's been done and having to do all the good again,

Is worth all the fighting to live in the perfect peace plan of pen;

For the writing of the right thing makes dominion dominate,

So that you can see what's worth working for in force to formulate.

Now he shall reign forever as lord over all the earth,

And God would have the victory seeing all things are worth;

For the beauty of creation is in the money being life magic,

Where the free gift for the duration is a long time not tragic.

And as the sun sets in the west and rises in the east again,

And down turns into dusk and the day has been and gone along;

And all the things within it turn into themselves from outside on,

And the time that it has taken is only leading all the dominion.

For the force of indignation and the ingenious of the indigenous,

Is the systems information of the dominions new creativeness;

And the power to build a nation and to govern it with style,

Is the power to run a station and the time all only while.

Signed,

Rational Acceptance
