

Really relativity is irrelevant to continuity of the relevance,

For revelations and relations are irrational to science for reasons;

The seasons come and go from here to now and there they change,

And relevance becomes relational for earth's direction time to rearrange.

So ideally reluctance is a real lucky chance of relevance,

So the relationship to relevance is irrelevant to reluctance;

Now to associate and connect is the real meaning of relevance,

When things understand each other and relevance is relational.

When you're looking relevant it is irrelevant to others,

For what is going on around the world is impersonal for lovers;

Well change is a constant and you have to look to see the believe,

That the relevance to others is relational to the difference to achieve.

Now save me from myself for the relevance is sales to others,

And the question to be asked is the answer to relationship with lovers;

And I want to sail around the world and build building to God,

Like the royal family is relevant to birthdays is rational and odd.

When the earth is ecologically balanced and environmentally friendly,

The life becomes purer and relevance is quality reassurance tending;

As the reluctance to the people to read relevantly applicable,

Is certain till it's read or written to lead to be applicable.

Always the chemical association of alcohol is usually irrelevant,

But doctors and psychiatrists know the difference and relevance;

For the intelligence of relevance is reluctant to relationship,

As we all well know now if you take relevance to reality shift.

Signed,

To the letter
