

From any point of time to any for reaching distant thought,

The passages of time are on the mind of what people bought;

Their hearts are in their heads and their minds are on things,

Like the telephone communication with its speed of different rings.

And as communication develops from television to computer,

The time it takes to travel get quicker than mind over matter;

For the life of living people and the things that last the time,

Are in the longevity of growing and the life's eternal mind.

So as the days grow older and the past is ruined for history,

We search and look to the future for the guidance of life's infinity;

And a child grows to a teenager with study in wisdoms school,

As the meaning of prolonging life is found in books of words to rule.

For the law of the creation and the one eternal mind of God,

Which is Christ young church foundation and experience at odd;

For the long and distant station of the nation with train of thought,

Is now in prayer and meditation from the written mind that sought.

As the world goes around and gets older and golder is the sport,

And the literature of heaven is on the mind of those who ought;

For decisions for the making of taking time to study the money,

Pay off well rewarding those who we patient and smart sunny.

So Parsifal prolongs life by the examination of the time years,

When understanding and knowledge is gain in information wisdom appears;

For the message of the money and the longitude and latitude of life,

Is elongated in the reproduction of replenishment through wife.

Signed,

Fountain of Youth
