

I guess I want the right mark but I really have to see it,

I hear you're seeing right and you want to see me write it written;

Well if you can get the mark you have a right to see it right,

But if you can see it written you haven't seen or cleaned the mark.

Now seeing that the mark was seen and cleaned by being written,

Then Britain got the mark and it was the queen seeing writing;

And the tries where for a while which sat and got the mark,

And I was writing sitting and seeing right, being written in the dark.

So God I really don't quite get it why I don't seem to get the mark,

When my English is good enough to sit writing and hear the hark;

For Noah was in the dark when God told him to build the ark,

And if you have faith in the mark see it right being the written mark.

Now when I clean the mark I sit down and write the mark,

But to get the mark I've written someone else must be in the dark;

For the mark that I have written was dark till I cleaned the mark,

And the dark mark clean and written is seeing clean the written mark.

Seeing right, being written means that I must of cleaned the mark,

For the mark that I get writing is the right mark to Britain's dark;

And the right dark written in Britain is the right mark in the spark,

That make the mark quite dark and was a light to hark the arc.

So if you see the right ark to write the arc you're dark,

And you hope you can get it right by writing the right mark;

And if you want to mark me get your own mark clean from dark,

For if the arc got a spark from the arc then the dark mark would hark.

Signed,

Cleaned and burnt a bit
