

I'm heading for trouble and that's my middle name,

There's no co-operation in the corporation and that's fair game;

I'm trying to be understanding and it's leading into real fame,

For when there's co-operation the corporation becomes real fame.

You know what happens when people point they make holes in the air,

So it takes a little understanding to co-operate and do it with prayer;

It was reasonable and acceptable to help each other and get on,

And the meaning was the pleasure as we understood complete co-operation.

And people wanted things by making and bartering instead of buying,

As the all co-operated in communism and there was plenty of trying;

So please understand that co-operation assists to help people,

As we work and we play and read what is right to reach equality.

With the immaculate conception of the purities co-operation,

Children come to the earth with a future for completion;

For tomorrow we borrow for the gifts of right and wrong,

Where black and white are past and colour is in words.

For the love of being is the correct attitude of prayer,

Where co-operation cooperates with the corporate planet;

And the duty of the beauty is to oblige the perfect concept,

As again co-operation merges to complete the stories complex.

And as we comply with the co-operation of the worlds complexion,

We gather and learn to understand the school of concern;

Where the completion of the reversal is forgiveness of adversity,

And all is said and done to be forgetting the co-operations adventure.

Signed,

Life's a challenge
