

A lot can be said about and for what's written down in ink,

A pen and a paper is not a book down the sink;

The atrocities of war and the concentration camp of life,

Are all terrible death and destruction in waste and is strife.

.

The hurting and the hating the greed and the pride,

The envy and jealousy and you wanting my bride;

To love and to cherish is a better choice and style,

Doing the work to advance for a long time and while.

.

We need doctors and medicine not nuclear war,

Where sin is rife and all the sick need a cure;

The law of the land is to do it properly and right,

To secure a piece of property with the pen and the write.

.

The production is procuring in a means of punishment,

For everything we need and want to have in the establishment;

The contentment we need and the happiness of heart,

Is the peace and prosperity of doing it hard, clever and smart.

.

What's all this fighting and what are the guns for,

If it's for taking life then pills are for sure;

Money is a means to justify all the ends,

Couldn't we make more helping people to be our friends.

.

And religious conflict is wrong and not the answer at all,

But love and the family and television or telephone call;

A walk in the park or work on a computer,

We all would be happier staying healthy as a commuter.

.
