

What is the problem with equality with some being rich and poor?

Some learn to make heaps of money while others are starving on shore;

Some are just born to win in life while others lose and enjure,

Is equality something to be grasped with all things being in equal accounts?

.

Some enjoy being rich and famous while others strive for a long time,

Some don't mind coming second for the first thing is money and crime;

Equality is some kind of idea where all things are being equal and true,

Perhaps we should strive for equality looking to have everything brand new.

.

The thing with equality is a matter of fairness where the balance amounts,

When with all things being equal the money goes to different accounts;

And it's sad and it's bad when the magic is tragic and equality is for all,

For the problem of all being the same is no difference in each individual.

.

But still we should aim for equality where evenness is high on a hill,

Where the earth turns in space with its mountains and people are well and ill;

And equality draws its own respect from all who endure and admire,

A fairness and balance in living and enjoying earth is a heavenly choir.

.

A low if you have a real love for reading where equality is right,

Then look to the God of creation who is always ready in might;

For he will protect you and not mislead you to higher places to live,

Where equality becomes a divine service to let all and each other give.

.

For it's the faith in the future of favour and past always dwelling behind,

That the beauty of infrastructure and nature always dwells on the mind;

So equally is a blessing of balance where good and evil agree?

Or is equality agreed for that nation to simply continue to breed?

.

Signed,

Fairness for all.
