

People on Earth and heaven in the far distant universe,  
Money in the bank and everything you ever really wanted;  
Getting what you really need and having to see the truth,  
Knowing how to do what you have to learning to love the proof.

People on Earth all being able to live in peace together,  
The love of one another and the beauty of being better;  
Finding out what God really wants and working have in hand,  
Living with each and every one of us, on each and every land.

People on earth around the globe and people in peace to know,  
Flying around the world I know to anywhere I want to go;  
The joy of living in freedom with the truth for us to bestow,  
Love in the hearts of every man, to work for woman and grow.

People on earth in each and every place in current time,  
When everything gone and past comes to the present prime;  
Where future needs are here today and tomorrow breeds no crime,  
And war and fighting cease to be and killing never in rhyme.

People on earth to breathe and breed, bred for daily living,  
Bread for each daily service of the need to feed in giving;  
For people need to love each other you see never knowingly why,  
As when in live you never die and wonder how high is the sky.

People on earth to look to God and see into his heart,  
Where creation is just an evolution and plenty being smart;  
Songs and poems the prayer of truth giving peace of mind,  
People on Earth singing praise to God and endlessly so kind.

Signed,

God in Heaven
