

Usually there's a fruit for all occasions,
But an apples a bit special in between those vacations;
Adam's apple has originated from the temptation off Eve,
Is an apple like a sin if you take one and believe.

You can go to New York the big apple or Tasmania the apple isle,
Newton discovered gravity as he sat under an apple tree for a while;
An apple a day keeps the doctor away,
Or at least that's true if you believe what people say.

There's nanna's apple pie and that's nice with cream,
Or there's the old granny smith apple that's ever so green;
There delicious ad tasty and crunchy to bight,
Or throw bad ones at people who still want to fight.

An apple cleans your teeth when you haven't time to brush,
But thats very improper and people tend to hush;
I think apples are great right down to the core,
And you'll find the apple has seeds that God can turn into more.
