

A new ruling or law not done before is called precedence,

When all of the progress have not known the proceedings;

So this establishes ambit to give a different meaning to rule,

So that the meaning is new and has evolved out of a school.

.

Precedence takes a priority in the laws governing the land,

Which is transcribed and recorded and type written by hand;

For the problem that was beating is beaten by the judge,

Who resides over the case and the sentence without grudge.

.

And the beauty of the verdict is a whole new way of life,

Where the things that had gone wrong are in righting of the strife;

So the decision becomes final 'til there is a new form of precedence,

On some other situation where nobody understands proceedings.

.

So the answer to the complexities of what was unknown now knew,

And the jurisdiction overruling of now what is the new and true;

Gives sufficient reason for a new outlook and point of view,

So what had been previously unknown is fully seen clear through.

.

For the almighty understanding of what could not be seen before,

Is in the vision of the seer and what was heard is in now to restore,

As the fullness of complaint is explained easily right here,

In the repetitive difference of explanations to appear.

.

So now the new kind of government must be passed to be believed,

The proof was in the pudding and the worry achieved conceived;

For to put it kind and bluntly the raw truth must be exposed,

In humanly decision of the precedence brilliantly composed.

.

Signed,

God is right
