

Give the game away you really have to look and pay,

The thing goes on all day in many a different fashioned way;

Television you say is really the best thing since slice bread,

You can watch it till you're blue in the face or really read and dead.

.

But the thing of it is that it is in a form of the entertainment industry,

A media tool for information giving ideas and issues relating;

It is away to understand to act and to perform for a living,

While whose advertising pays for those who go on by the giving.

.

Television a reward to those who work hard to be famous,

A relaxation and past time to the viewers of the family;

There's a deeper hidden message for those who do read,

That there is a living in the making if you watch and learn to lead.

.

There's children's shows and serials or movies and music,

But thereason for station owners channels is really making money;

So consider your time wisely and don't be all consumed,

For the magnate and the producer has directing all assumed.

.

The technology has evolved and digital LCD is here,

And the beautiful picture you get is for the eyes and ears;

So listen to the voices and see the scenery of the world,

For it's really very nice to watch but time is in the word.

.

As the universe expanded so in it you can now see all around,

From the lounge room to the city you travel on the ground;

So save some time and money and see the places for yourself,

And remember that the television is for myself to balance with the shelf.

.
