

The Red sea was parted and divided to suit the need,

The Israelites had to pass through and the Egyptians had to read;

You see Moses was the leader appointed by God to lead,

The Israelites passed through the water and the Egyptians were dead indeed.

.

Division is a horrible thing in the creation the deed of civil war,

When people's minds are divided and confusion prevails as law;

Even in clever business decisions there is always something wrong,

That affects the price of production and money takes all so long.

.

Divide it into quarters so the division is twenty five percent,

There's not a decent answer to not drown all those hell bent;

The church only asks for a tenth which is only ten percent to pay,

That all the in division will turn the earth and divide all day.

.

Division is a decrease in the logical reduction of waste,

That the less we have to worry about will turn to increase in haste;

As we recycle all the products and divide up the returns,

The profit of the dividend is all divided and re earns.

.

Division I'll understand is really a reduction in the cost,

Of what is saved from ruin and recovered from the lost;

So save up all the fractions and add them all to the list,

For division is complicated and provides to those who insist.

.

Division now my people is not all dead at the end of the line,

But through many fine reductions equality just fits in fine;

If you buy the specials regularly a division of the sale is sell,

So the price is closer to cost and then leave and smell the cell.

.
