

Well complexity is the certainty of the complete situation,

When nothing is surer than something, someone saw at the station;

For like everything else ,complexity is high intelligence confused,

When you have a banana and coffee and are both easily amused.

.

You see the simple predicament of being right every time,

Which is highly complex but must be leftÂ to writeÂ eachÂ rhyme;

As the brain is as complex as the origins of life itself,

So you must make the complexity, easy to understand yourself.

.

IfÂ poetry is fashioned to be reasonable and reflect?

You must understand the intelligence and complexities detect;

For if life was all quite simple without complexities around,

The mind would be humble and the great would be ground.

.

So complexity is a lot more than just like being par for course,

That would be simple, but even that is a hard to attain resource;

Then like the paradigm of beauty is the paradox of life,

For something that is ugly can lead to complexities and strife.

.

Well it is a complete misunderstanding that complexity is simple,

For that is an antonym by me trying to be smart but not sinful;

For if opposites attract, then the complexity is nicely hard for all,

Because we all like to get on and have friends we can call.

.

So my limited intelligence is not as high as all that,

For the complexity of completion leaves it all old hat;

NowÂ I could be too complex becauseÂ that wouldÂ beÂ fine in all ofÂ this,

And that is not so simple, for the best way to be smart and be his.

.

**Signed,**

**I must comply.**
