

Well the complexities were perplex and puts this in perspective,

The perplexion of the complex is the perspective in perfection;

Well there's nothing left for the kids to write aboutÂ at school,

So there's no way they'll get top marks if that is the rule.

.

So I have no perspective on what it is really right to write,

Because I've written it all in and perspective has got to be right;

SoÂ if IÂ put like this into perspective we have to learn all there is,

When it's really the world in turning and love between her and his.

.

Now I'm even writing the wrong and that is not the right idea,

And now even that is in perspective as we age in time draw near;

To have everything in the right perspective, it's beautiful and ideal,

But the reality is people are worrying negatively wanting everything real.

.

If happiness is really the greatest perspective and all we really want,

More time's instead of's money, or's for working on's which to wait;

Having to manage with women, is it love earning a keep,

Which puts the family in top perspective and things that are dead in a heap.

.

Like you tear down the old to build new or keep historical heritage,

And the work becomes priority in's perspective and just sleep and eat;

But advancement comes into perspective as well as move forward each day,

That perspective of being reflective is the knew and the positive way.

.

So lets gather our thoughts on perspective and remember them well to say,

For the memory of how we have done it, will be recorded with hell to pay;

So perspective is now in the balance of what is keen to tell,

Like everything now was a sale to sellÂ and perspective is like from a cell.

.

Signed,

It must be rational.
