Something to type from these things that I write,

The right kind of thing for the type of something to be right;

When the thing is type it is the right type of thing for something,

So it's kind of you to type and the type of thing is what I write.

Now the right kind of thing that is something to type that I type,

And type is kind of type of kind of thing that is something to type;

Well the typing takes time for the person typing the things I write,

So that when the things I write and typed, something to type is right.

You want to read the things that I type because of the type of thing,

And the type of thing you type, I type because of the typing;

Now if the typing is being wiped the type of typing is typed right,

As I type the type of things and you read the things I type and write.

Well if you have got a typewriter instead of a computer, mums right,

And if mum is right as she always is right, it the type of write;

For her type of right I write for mum to type right,

As she used a typewriter and I type on a computer for the type.

Now the type of computer I type on does really not matter,

For you need the writing of something to type on your computer;

And I write with a pen for someone to type the something,

So that this something to type is typed of the write I write for type.

Then the something to type is being typed and the type to be,

But not red but black type for computers are not like typewriter's read;

You can have any kind of type in any kind of colour but the you read,

Is something to type so you retype and you can read type and lead.

Signed,

I can lead type
