

The bit of it is a bit of it and a bit of it is this bit of it,

That when you sit down o it and write it a bit, it all comes as one bit;

So now that I have written a bit of it I wonder what is left to write,

For when you have written a bit of it you remember a bit more to write.

And every little bit of it that you sit down and write a bit of it,

Is a bit of it as you think of it and it ends up being into all of it;

Now I know that a bit of it is not all of it nut I am getting to it a bit,

For each bit of it has a meaning to it as you sit down and write a bit of it.

But I would rather not get into all of it until I have finished a bit of it,

For all of it is a bit of it and a bit of it is what I sit and write of it,

As each bit of bit of it falls into place for the rest of all of it,

I wonder how it will finish when all I need to write is a bit of it.

Now if a bit of it was all of I, it would certainly be all finished,

But by now you have more than a bit of it and it is being relinquished;

For every bit of it is an inch of it and a bit of it is quiet distinguished,

But the rest of it of a bit of it you have to write it all in real English.

Now I don't know as how that a bit of it can end up being it all,

But at least I do know that a bit of it is heading down the page on call;

For the real end of it is just a bit of it away from the end of all of it,

And the secret to writing a bit of it is to remember the line has to be fit.

Then if the line will all fit as it really has to be a bit of it,

And you stretch and you strain to really write all of it;

Then the answer to the end of it is not to question even a bit of it,

As a bit of it is everything that it was ever going to be a bit of it.

Signed,

The right bit of it
