

The whole life or the hole dead,

One must wonder wisely for one must use their head;

Over the years of blindness of 2000 meanings in time,

The ore which is money is the awe of notes in rhyme.

Two thousand years or more right up to the year 2020,

Where God will see the end clearly and people have the plenty;

The whole life is not just time and money, but many ideas,

All different kinds of ideas that people read right down the years.

The age of people varies as we each choose and walk our path,

Where the life is in the living and death is worth a laugh;

Because people seem to always want money for each breath;

As things cost money but really need time for each one hates death.

We really need to breathe all the time and not ever really stop,

But bread must be fresh daily like all the food that's in the shop;

Now the years and days are months of spending money passing time,

And the reason that m writing is because greedy people crime.

So the whole life of the person is very special at the end of time,

When we all have seen our days and things are write to rhymes;

For the right of the right writing is a whole new world away,

Like the whole life of the earth will never end each day.

For each reason that the season gives meaning touching lives,

Is because there is a purpose for children, men and wives;

But the beauty of the brilliant is a new whole life each day,

As the turning of the world moves continents in technologies way.
