

Think and see what you can do, understand what's old and new,

A thing at sea and the oceans around and the worlds continents land;

Like tropical islands to visit and people native with their food,

Look around about you and find the fine line of life as a mood.

Love is free and easy but life is really as hard as rocks,

As you understand what's best and try and better safe locks;

For you are at your disposal and I really want what's right for me,

Perfect as it all is it pays to be rational to think and see.

The beauty of the feeling is the atmosphere of emotion for free,

As you look and want to learn, have to know, to think and see;

For reality is magic when you're job of work is a love of labor,

And all the capability and capacity of ability is sweet to savor.

Actually what we need to now is how to do it all to get it right,

Like when you partners relationship with you is in the truth and light;

Think and see and listen and hear what the ear sees with the eye,

Like life knowing and understanding the romantic passion of it.

Now I have to read you and lead you to your eternal desire,

As you put me in your audience as I sing in your choir;

As the light is offered over to the hairy things that drag you down,

Think and see and look to the sun as it shine above and around.

If you can, you really must take time out for the singers music,

Where poetry is answered in vision of sweet sounding listening;

So think and see what's happening and going on around and about,

For always, knowing what is right should never deny or doubt.

Signed,

Perfect harmony
