

Parsifal Enterprises, my business and company exists to seek, find and judge the truth, in word, deed, law and policy.

To set an example to be followed for literary lifrastructure as a way and reason to think with purpose for living out our everyday lives. Through wisdom, knowledge and understanding, create logical ideas to use in the business world, family centres and homes.

That through the exposition of existence, origins and purpose, the truth is made clear and clarity is given to grey or cloudy ideologies so that there would be answers given to those questions which remain prophetic and or unexplainable.

Its profits through written literature will fund itself for the advancement of society and the management of economic circles in systems that reality requires to be true correct and perfect in all its design, trust and establishment.

Overall its aim is to make humanity depict total humility for the world to be a better place to live.
