

It's possible to be positive through night and through day,

When optimism can be negative and sight a bit grey;

It's better to look on the bright side with all things possible,

So that what can be logical gives ideas that are probable.

.

Try and remain young at heart and dream all that you can,

Where the earth turns around and it is a planet with a plan;

Put a few goals down from the mind in your head with a pen,

And think along with positives for both women and for men.

.

It's possible of course that no one will give anyone any care,

So it's better to pray and ask for anything to God in prayer;

And If you now look to the future it will be shining and bright,

Things will work out of being in the dark to go into the light.

.

Try and stay calm and think things throughout logically,

As there are reasons and seasons to do things methodically;

Don't try and score points from people as this can go wrong,

For the loser can become a winner and can usually go long.

.

It's possible to think of ways of always staying on top,

When you go out and spend on buying things from a shop;

But the buyer must be aware of the profit of the seller,

Of he only thinks of himself and as becoming a richer feller.

.

Try and let each other live as well as doing all that you can,

For that is the answer to life and being a quite clever man,

And it's possible that you'll die as we all must do someday,

But being forever in eternity has a chance of a possible pay.

.

Signed,

When it's best left to God.
