

The word is work I have got news for you,

For where in the world would it all come true;

Is it all so hard for us to do and write?

So let's take it in turns so it all ends up right.

.

When everyone wants a job like it's the same thing to do,

We have to understand the differences of who knew;

For people put in an effort that demands a reward,

Not like at school when the information is on the board.

.

Things must get done at the required time and price,

But to work in freedom is always so doubly nice;

What about your pay at the end of the week, month or day,

Is it worth all the trouble through all the grey way?

.

If you can write or rhyme all the words in a line,

It is better than picking up a shovel and doing it on time;

In a twist and a shake it all seems to get done,

But without a sense of humor it is not very much fun.

.

The word is work and it is really so very hard for me,

With so many times and people all wanting to see;

For me it is management but the staff must be happy,

And enjoy all those deeds that leaders demand snappy.

.

It is now time to type this word which is work,

Which is getting easier to read after going on a nice walk;

But if you want to turn it around and to lead;

Pick up your pen and work out the cost and the need.

.

**Signed,**

**That will do,**

**It was written.**
